

DR. DAL ALEXANDER, D.O.

Board Of Trustee Member & Co-Founder
Maxitia Project Inc.

Dr. Dale Alexander has been in practice for over 20 years, in the field of Physical Medicine and Rehabilitation with a certification in Acupuncture. A native of Brooklyn, New York, after graduating from the New York School of Osteopathic Medicine in Old Westbury NY, Dr. Alexander started practicing in New York City. Dr. Alexander has been involved in many different endeavors in addition to his practice. Since 2005, Dr. Alexander has been the team Physician for the New York Police Department Football team, baseball team and the boxing team. He has also served as a New York, Nassau County Police Surgeon.

Dr. Alexander is continually active in the community. He is the founder and former president of the Combat Wounded Veterans of America. It was founded to ensure that all our nation's combat wounded veterans are properly recognized, honored, and supported for their service.

Dr. Alexander is longtime supporter and health advisor to Vision Urbana Inc, a community-based organization. Vision Urbana Inc provides public health and preventive health educational programs to the community members of the lower east side in New York City. He also provides health care services and oversees a health shepherding program to assure that the community has access to quality health care. The shepherding program has grown to cover the entire United States of America and now includes the Caribbean, Central and South America. Dr. Alexander has been involved in the care of thousands of people, including transfers of patients internationally to US facilities for care.

With the onset of the COVID-19 Pandemic, Dr. Alexander “retooled” his practice to help in the fight COVID-19. In addition to joining the New York City Medical Reserve Corp (created to strengthen public health, improve emergency response, and build community resilience), Dr. Alexander also joined the COVID-19 response effort in New Jersey. He received a New Jersey state temporary emergency license for out-of-state practitioners and helped hundreds of community members in the state of New Jersey.

To expand the catchment area of these health care programs, Dr. Alexander and his partners created a COVID 19 - HOTLINE. DA Medical Services partnered with the Essex County Latino American Chamber of Commerce, NJ, and the National Hispanic Chamber of Commerce on Health to launch this still ongoing, health access and information HOTLINE.

The purpose of the HOTLINE is to provide information about the Coronavirus crisis; health related resources that are available to the community, and when possible, assist in accessing health care.

The goal is to make available to those who might not be able to get around for whatever reason, information that will help them determine whether; they can be

managed at home or will need to seek health care in a healthcare facility, Emergency Room, or Hospital. Through this program, Dr. Alexander and his team have helped thousands of people not only in the Tristate area, but nationally and internationally. The program is designed to reduce the burden on our healthcare system. The work of this program lead to the creation of the International Society of Health Education. This organization provides health education and other resources to health providers around the world.

For his work over the last 2 years, overseeing a range of community health education programs for DA Medical, and helping community members access health care services, and creating a process through which patients are referred and tracked across New York City's health system. Dr. Alexander was named to the Crain's New York Business 2022 NOTABLE HEALTH CARE LEADERS.
